Honors And Achievements

- Selected as Section Leader at **Stanford University:Code In Place** from 2000+ applicants for teaching python. [\[link\]](#)
- Top team lead at **Harvard CS50x Puzzle Day** scored 9/9 by solving algorithmic problems. (2024,2025 & 2026). [\[link\]](#)
- Ranked in the top 12% among 820+ international teams at the **UC Berkeley Coding Competition**. [\[link\]](#)
- Invited as a **guest speaker** for a webinar on the “Generative AI Essentials” to 1000+ students. [\[link\]](#)
- Qualified for **Meta Hacker Cup** Round 1, ranked 81st globally & **5th in Pakistan**. [\[link\]](#)
- **3rd position** out of 123 teams at Codestral Hackathon, recognized for innovative solutions. [\[link\]](#)
- Completed 50/50 challenges in the 25-day **Advent of Code 2024** series, secured **46th** national among 311,017. [\[link\]](#)

EDUCATION

[University of Sahiwal](#)

Sahiwal, Pakistan

Bachelor of Science in Information Technology, **CGPA: 3.58/4.00**

Dec 2021 - Jun 2025

Relevant Coursework: Data Structures & Algorithms, Probability & Statistics, Linear Algebra, Database Systems, Information Security, Computer Networks, Operating Systems, Software Engineering, Cybersecurity.

TEACHING & MENTORING EXPERIENCE

Stanford University: Code In Place

(Remote) CA, USA

Role: [Section Leader](#)

Apr - Jun 2024

- Selected from 2,000+ global applicants; conducted 6 weekly live sessions on Python fundamentals for **12+** international learners with personalized code reviews and one-on-one mentoring.

Pak Angels

(Remote) San Jose, CA, USA

Role: [Instructor & Hackathon Judge](#)

Jun -Jul 2025

- Delivered a 6-week GenAI curriculum covering LLM APIs, RAG pipelines, and prompt engineering to 1,000+ students
- Evaluated **10+ final AI projects** as a hackathon **mentor & judge**.

Iqra Fund

(Remote) Blue Diamond, NV, USA

Role: [Python Instructor](#)

Dec 2024 - Jan 2025

- Taught **Python fundamentals**, including variables, loops, functions, and debugging.
- Led interactive coding sessions using basic Microsoft tools for over **70+ underprivileged girls**.

iCodeGuru

(Remote) CA, USA

Role: [Course Trainer and Moderator](#)

Jun 2023- Jul 2025

- Taught Python, Data Structures & Algorithms, and Generative AI to **500+ students**
- Through **100+ hours** of live, hands-on sessions.
- Delivered a 5-week IELTS/Duolingo prep course.
- Helped students build academic English skills for international university admissions.

INVITED TALKS & WORKSHOPS

- Delivered a **2-hour** online workshop on “**How to Build Your First AI App from Idea to Deployment.**” [\[link\]](#)
- Mentored a 5-day “**UC Berkeley Calico Contest**” prep workshops for **100+ students**. [\[link\]](#)
- Delivered an online workshop on “**Object Oriented Programming**” for **80+** underprivileged learners. [\[link\]](#)
- Invited as a guest speaker to **share my teaching experience** from Stanford University: Code In Place program. [\[Link\]](#)
- Led a **Meta Hacker Cup prep webinar**, guiding participants on problem-solving and contest strategy. [\[Link\]](#)

RESEARCH & ACADEMIC PROJECTS

1. Large Language Model

MediScan: Multi-Agent Retrieval-Augmented System for Clinical Report Analysis [\[link\]](#)

Tools: Python, LangChain, LLaMA-3.3 (Groq API), FAISS, Flask

- Built a multi-agent RAG system for medical report analysis across cardiology, pulmonology, and psychology domains.
- Developed a FAISS-based retrieval pipeline using clinical reference notes for diagnostic information retrieval.
- Evaluated routing consistency across medical domains and analyzed limitations in handling cross-domain conditions.

2. Natural Language Processing

NLP-Based Phishing Website Detection System [\[link\]](#)

Tools: Python, Scikit-learn, NLTK, CountVectorizer, Logistic Regression, Streamlit, Pandas, NumPy

- Built an NLP-based phishing URL detection system using 549K+ labeled URLs to classify websites as **phishing**, **malicious** or legitimate through lexical preprocessing and feature extraction.
- Trained and compared Logistic Regression and Multinomial Naive Bayes models, achieving 96.5% accuracy with strong phishing detection performance and low false-positive rates.
- Developed a Streamlit-based real-time phishing URL detection system by integrating preprocessing and machine learning classification into a single pipeline.

3. Computer Vision

Computer Vision-powered Traffic Sign Recognition System [\[link\]](#)

Tools: Python, Keras, CNN, Flask, NumPy, Matplotlib

- Built a CNN-based system to classify 43 traffic sign categories under varying lighting and visibility conditions, achieving **~94% test accuracy** on unseen data.
- Applied class-weighted learning to improve recognition of underrepresented traffic sign classes.
- Integrated the model with Flask for real-time traffic sign detection with low-latency inference suitable for practical.

INTERNATIONAL HACKATHON PROJECTS

Co-Creating with GPT-5 Hackathon [\(view details\)](#) Aug 2025

Project: SmartLearn (AI-Powered English Learning Assistant)

Tools: Python, Streamlit, FAISS(database), GPT-5 model, LangChain

- Created an AI tool that gives real-time **grammar help, vocabulary suggestions, and speaking practice feedback**.
- Added **personalized learning paths** so users get tasks based on their skill level.
- Used **semantic search** and LLM logic to give clear and natural explanations during practice.

Trae AI IDE: Zero Limits Hackathon [\(view details\)](#) Jun 2025

Project: GeneGazer (AI-Driven Single-Cell RNA-seq Analysis Platform)

Tools: Streamlit, Scanpy, Python, Google Gemini AI

- Built a platform to automatically process **single-cell RNA-seq data** and show interactive visual results.
- Applied steps like normalization, **PCA, UMAP**, and clustering for exploring cell-level data.
- Made the analysis faster and easier for users by adding guided workflows.

SKILLS

Programming Languages:	Python, JavaScript, SQL, Bash
Libraries:	TensorFlow, Keras, scikit-learn, NLTK, OpenCV, LangChain, FAISS, RAG pipelines
Tools & Deployment:	Git, Jupyter, Google Colab, Linux, Flask, Streamlit, REST APIs, Firebase
LLM Tooling:	LLaMA, GPT family, Google Gemini, Groq API, prompt engineering
